

Environmental Policy

Policy Statement

Tidal Solutions recognises the importance of environmental protection and sustainability and is committed to undertaking its business in a manner that provides operational processes that minimise harm to the environment, we achieve this by:

- Providing sufficient and suitable resources for implementing the environmental management processes in order to protect the environment from pollution
- Educating and training the company's team to continually improve awareness, skills and knowledge of environmental issues and practices
- Establishing, maintaining, monitoring, reporting, reviewing, auditing and continually improving the environmental management system procedures and processes in accordance with ISO 14001:2015
- Managing environmental and related issues in accordance with relevant legislation, client requirements, policies and procedures
- Taking all practicable measures to minimise pollution, waste and any further adverse effects
- Promoting products or services which reduces the demand on natural resources or energy
- Pursuing ecologically sustainable development initiatives, while minimising the carbon footprint wherever practicable
- Considering how the company's operations and activities affect climate change
- Striving to conserve resources, reduce waste and eliminate or minimise adverse environmental effects and risks that may be associated with our services and operations
- Integrating environmental considerations into all aspects of Tidal Solutions activities.
